

CERTIFICATE OF SENSOR CALIBRATION

Critical Environment Technologies Canada Inc.

FIXED SYSTEMS CERTIFICATE OF SENSOR CALIBRATION

There is a \$25 fee (in the same currency as the invoice) for the Certificate of Sensor Calibration for fixed systems. The same fee applies whether the certificate is ordered at the time of the order or after the fact. We will not automatically create the Certificate, it must be included as a line item on the order.

It is our policy to include a Certificate of Sensor Calibration (p/n: CERT SEN) as a line item on all applicable quote requests. If you send a purchase order in with the quote copy and do not want a Certificate you will have to indicate that.

Approximately 75% of the people that want a Certificate forget and order them after the fact. This interrupts the flow of assembly and creates extra work for our Production Department in turn slowing down our ability to get orders out the door.

IAQ MONITORS CERTIFICATE OF SENSOR CALIBRATION

The YESAIR and YES Plus LGA IAQ Monitors come with a Certificate of Sensor Calibration.
