

DISCONTINUED PRODUCTS POLICY

Critical Environment Technologies Canada Inc.

Many of our products have withstood the test of time and are still operating in the field. Unfortunately we are unable to source or manufacture replacement parts for many of our older products. As a result, we will not be able to sell replacement parts or offer field service for these products and technical support will be limited.

Our present day product lines offer better technology, features and functionality. We would be glad to assist you in choosing the best replacement gas detection system, controllers or transmitters to ensure minimal interruption, cost effective operation and continued support.

The table below shows the type of support available for each discontinued product series, along with current replacement product choices.

COMPLETE SYSTEMS	FIELD SERVICE	TECHNICAL SUPPORT (PHONE/EMAIL)	PRESENT DAY SYSTEMS*
PDC + DST	Not available	Minimal assistance provided, \$65/hour for detailed instruction	FCS + LPT-P FCS + LPT-M FCS + CGAS-D
PDC + 8 analog transmitters (AST, AST-X, etc.)	Not available	Minimal assistance provided, \$65/hour for detailed instruction	FCS + analog transmitters (LPT, LPT-A, CXT)

*Up to a 15% discount may be given towards the purchase of a current complete system of choice.
